## *Who Should Attend?*

Disasters can and do occur any time, any place. Noah's Wish training has made great strides over the past few years in developing relevant, timely and professional educational programs designed to meet the needs of emergency management personnel.

Are you personally prepared to care for your animals if they are impacted by a disaster? What about your community, are they ready? If you answered no to either of these questions, Noah's Wish training programs are designed to help individuals and communities prepare to care for animals in disasters.

Here's Who Could Benefit from Noah's Wish training programs:

- Emergency Managers
- Animal control/shelter staff,
- SART, DART, CART and CERT members
- Animal handlers/trainers
- Veterinarians, Veterinary Technicians & staff
- Other volunteer organizations
- Or anyone interested in the welfare of animals before, during and after disaster strikes.

### **The One-Day Workshop**

Is portable, customizable, economical and provides valuable information on preparing for and managing through emergency situations. Included are:

- Community and Individual Preparedness
- Safety
- Animal Intake Procedures and Emergency Shelter Operation
- What to do in the first hours before outside help arrives
- Demobilization process and procedures
- Managing Volunteers

### **The Two- Day In-Field Training**

Provides the basics on disaster response for animals including:

- Personal preparedness
- Disaster Topics
- Safety
- Psychological impact of disasters
- Shelter Operation
- Intake, reclaim and Foster Care
- Species specific care and handling
- Basics of animal health in a shelter environment
- Team Building
- Incident Command System

Both sessions are interspersed with practical hands-on application of skills learned, giving trainees the opportunity to apply what they learn, ask questions and practice prior to responding to an actual disaster.

### **Be Prepared, Not Scared**

Not only does Noah's Wish training prepare individuals to respond to disasters, but those completing the Two-Day workshop and required Incident Command training automatically become qualified to respond to disasters as part of the Noah's Wish disaster response team.

- By attending trainees will enhance their disaster response skills
- Perform safely in disaster situations
- Gain perspective on national disaster responses and the Incident Command System (ICS)
- Be personally prepared for any disaster

A well run training with lots of information applicable to disaster response and animal shelter work. I really enjoyed the hands on topics too.
